COM(2022) 305 final

ANNEXES 1 to 7

ANNEXES

to the proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

**on the sustainable use of plant protection products and amending Regulation (EU)
2021/2115**

{SEC(2022) 257 final} - {SWD(2022) 169 final} - {SWD(2022) 170 final} -
{SWD(2022) 171 final}

ANNEX I
referred to in Article 4

**METHODOLOGY FOR CALCULATING PROGRESS TOWARDS ACHIEVING
THE TWO UNION AND TWO NATIONAL 2030 REDUCTION TARGETS**

This Regulation is the instrument used to achieve the pesticide reduction targets contained in the Farm to Fork Strategy by requiring each Member State to contribute to achieving by 2030 a 50 % Union-wide reduction of both the use and risk of chemical plant protection products ('Union 2030 reduction target 1') and the use of more hazardous plant protection products ('Union 2030 reduction target 2'). This Regulation also regulates the contribution of each Member State to these Union targets. Each Member State contribution, set in the form of a national target, to Union 2030 reduction target 1 is referred to as a 'national 2030 reduction target 1', while a Member State contribution to Union 2030 reduction target 2 is referred to as a 'national 2030 reduction target 2'. The methodology for calculating progress towards achieving these targets is set out below:

SECTION 1

**National 2030 reduction target 1: methodology for estimating progress towards the
reduction in use and risk of chemical plant protection products**

1. The methodology shall be based on statistics on the quantities of chemical active substances placed on the market in plant protection products under Regulation (EC) No 1107/2009, provided to the Commission (Eurostat) under Annex I to Regulation (EC) No 1185/2009 of the European Parliament and of the Council¹.
2. The following general rules shall apply for the calculation of progress towards achieving reduction target 1:
 - (a) progress shall be calculated on the basis of the categorisation of chemical active substances into the 4 groups set out in the Table in this Annex;
 - (b) the chemical active substances in group 1 shall be those listed in Part D of the Annex to Commission Implementing Regulation (EU) No 540/2011²;
 - (c) the chemical active substances in group 2 shall be those listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011;
 - (d) the chemical active substances in group 3 shall be chemical active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and are listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408;
 - (e) the chemical active substances in group 4 shall be those not approved under Regulation (EC) No 1107/2009, and therefore not listed in the Annex to Implementing Regulation (EU) No 540/2011;

¹ Regulation (EC) No 1185/2009 of the European Parliament and of the Council of 25 November 2009 concerning statistics on pesticides (OJ L 324, 10.12.2009, p. 1).

² Commission Implementing Regulation (EU) No 540/2011 of 25 May 2011 implementing Regulation (EC) No 1107/2009 of the European Parliament and of the Council as regards the list of approved active substances (OJ L 153, 11.6.2011, p. 1).

(f) the weightings in row (iii) in the Table in this Annex shall apply.

3. Progress towards achieving reduction target 1 shall be calculated by multiplying the annual quantities of active substances in plant protection products placed on the market for each group in the Table in this Annex by the relevant hazard weighting set out in row (iii), followed by the aggregation of the results of these calculations.

Table

Categorisation of active substances and hazard weightings for the purpose of calculating progress towards national 2030 reduction target 1

Row	Groups			
	1	2	3	4
(i)	Low-risk chemical active substances which are approved or deemed to be approved under Article 22 of Regulation (EC) No 1107/2009, and which are listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011	Chemical active substances approved or deemed to be approved under Regulation (EC) No 1107/2009, and not falling in other categories, and which are listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011	Chemical active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408.	Chemical active substances which are not approved under Regulation (EC) No 1107/2009, and therefore which are not listed in the Annex to Implementing Regulation (EU) No 540/2011
(ii)	Hazard Weightings applicable to quantities of chemical active substances placed on the market in products authorised under Regulation (EC) No 1107/2009			
(iii)	1	8	16	64

4. The baseline for reduction target 1 shall be set at 100, and is equal to the average result of the above calculation for the period 2015-2017.
5. The progress towards achieving reduction target 1 shall be expressed by reference to the baseline.
6. The Commission shall calculate the progress towards achieving reduction target 1 in accordance with Article 34(2) of this Regulation for each calendar year and at the latest 20 months after the end of the year for which progress towards the reduction target 1 is being calculated.

SECTION 2

National reduction target 2: methodology for estimating progress towards reduction in the use of the more hazardous plant protection products

1. The methodology shall be based on statistics on the quantities of active substances placed on the market in plant protection products under Regulation (EC) No 1107/2009, provided to the Commission under Annex I to Regulation (EC) No 1185/2009.
2. Progress towards achieving target 2 shall be calculated by adding together the annual quantities of chemical active substances contained in more hazardous plant protection products placed on the market each year.
3. The baseline for reduction target 2 shall be set at 100, and is equal to the average result of the above calculation for the period 2015-2017.
4. Progress towards achieving reduction target 2 shall be expressed by reference to the baseline.
5. The Commission shall calculate progress towards achieving reduction target 2 in accordance with Article 34(2) of this Regulation for each calendar year and at the latest 20 months after the end of the year for which progress towards reduction target 2 is being calculated.

SECTION 3

Union reduction targets

1. The methodology for calculating trends towards the two Union 2030 reduction targets shall be the same as the methodology for calculating trends at national level as set out in Sections 1 and 2.
2. The trend at national level shall be calculated using national statistics on the quantities of chemical active substances as defined in point 3 of Article 3 of this Regulation placed on the market in plant protection products under Regulation (EC) No 1107/2009, provided to the Commission under Annex I (Statistics on the placing on the market of pesticides) to Regulation (EC) No 1185/2009.
3. The trend at Union level shall be calculated using Union statistics on the quantities of chemical active substances as defined in point 3 of Article 3 of this Regulation placed on the market in plant protection products under Regulation (EC) No 1107/2009, provided to the Commission under Annex I (Statistics on the placing on the market of pesticides) to Regulation (EC) No 1185/2009.

ANNEX II

DATA TO BE PROVIDED IN ANNUAL PROGRESS AND IMPLEMENTATION REPORTS BY 31 AUGUST OF EACH CALENDAR YEAR

Part 1: Annual trends in progress towards achieving national 2030 reduction targets

1. the trends in a Member State's progress towards achieving the two national 2030 reduction targets referred to in Article 10(2), point (a);
2. all other national indicative targets indicated in Article 9(2), point (a), Article 9(3), point (a) and Article 9(4).

Part 2: All other quantitative data relevant to implementation of this Regulation and level of compliance with it

Use of plant protection products:

1. the percentage of professional users controlled for integrated pest management implementation;
2. the percentage of professional users failing to comply with the obligation to keep electronic records on integrated pest management implementation;
3. the percentage of professional users that failed to comply with the obligation to keep pesticide use data electronically;
4. the number of aerial application permits, the validity period of the permit, as well as the size and the location of the areas concerned, and reasons for the permit granted;
5. the percentage of utilised agricultural areas and other areas covered by aerial application permits;
6. the number of permits for use of plant protection products in sensitive areas;
7. the percentage of utilised agricultural area and other areas covered by permits for use of plant protection products in sensitive areas;
8. the estimated quantities of illegal plant protection products used and the quantities of illegal plant protection products detected;
9. whether Member States have applied derogations allowing for
 - (a) different inspection requirements to application equipment in professional use that represents a very low scale of use, or
 - (b) exemptions from inspection for handheld application equipment or knapsack sprayers, in professional use.

Training and advisory services:

10. the percentage of professional users, advisors and distributors trained in the subjects listed in Annex III and holding a training certificate in accordance with Article 25 or who has a proof of entry in a central electronic register in accordance with Article 25(5), broken down by professional users, advisors and distributors;
11. the percentage of professional users that failed to comply with the obligation to use independent advisory services at least once a year.

Application equipment in professional use:

12. the estimated percentage of application equipment in professional use registered on the electronic register of application equipment in professional use;
13. the percentage of registered application equipment in professional use and due for inspection that has been inspected;
14. the percentage, at time of inspection, of application equipment in professional use fitted with risk mitigation devices.

Member State further measures to implement integrated pest management:

15. the percentage of utilised agricultural area in each Member State that is covered by crop-specific rules that have been made legally binding under national legislation.

ANNEX III

TRAINING SUBJECTS REFERRED TO IN ARTICLE 25

1. All relevant legislation regarding plant protection products and their use and risk and in particular this Regulation. While not exclusive, the following legislation is relevant:

Regulation (EC) No 1107/2009 of the European Parliament and of the Council³

Regulation (EC) No 396/2005 of the European Parliament and of the Council⁴

Regulation (EU) No 528/2012 of the European Parliament and of the Council⁵

Regulation (EC) No 1185/2009 of the European Parliament and of the Council⁶

Regulation EC No 1272/2008 of the European Parliament and of the Council⁷

Regulation (EU) 2017/625 of the European Parliament and of the Council⁸

Regulation (EU) 2021/2115 of the European Parliament and of the Council⁹

Directive 2006/42/EC of the European Parliament and of the Council¹⁰

Directive 2009/127/EC of the European Parliament and of the Council¹¹

Directive 2000/60/EC of the European Parliament and of the Council¹²

³ Regulation (EC) No 1107/2009 of the European Parliament and of the Council of 21 October 2009 concerning the placing of plant protection products on the market and repealing Council Directives 79/117/EEC and 91/414/EEC (OJ L 309, 24.11.2009, p. 1).

⁴ Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC (OJ L 70, 16.3.2005, p. 1).

⁵ Regulation (EU) No 528/2012 of the European Parliament and of the Council of 22 May 2012 concerning the making available on the market and use of biocidal products (OJ L 167, 27.6.2012, p. 1).

⁶ Regulation (EC) No 1185/2009 of the European Parliament and of the Council of 25 November 2009 concerning statistics on pesticides (OJ L 324, 10.12.2009, p. 1).

⁷ Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (OJ L 353, 31.12.2008, p. 1).

⁸ Regulation (EU) 2017/625 of the European Parliament and of the Council of 15 March 2017 on official controls and other official activities performed to ensure the application of food and feed law, rules on animal health and welfare, plant health and plant protection products, amending Regulations (EC) No 999/2001, (EC) No 396/2005, (EC) No 1069/2009, (EC) No 1107/2009, (EU) No 1151/2012, (EU) No 652/2014, (EU) 2016/429 and (EU) 2016/2031 of the European Parliament and of the Council, Council Regulations (EC) No 1/2005 and (EC) No 1099/2009 and Council Directives 98/58/EC, 1999/74/EC, 2007/43/EC, 2008/119/EC and 2008/120/EC, and repealing Regulations (EC) No 854/2004 and (EC) No 882/2004 of the European Parliament and of the Council, Council Directives 89/608/EEC, 89/662/EEC, 90/425/EEC, 91/496/EEC, 96/23/EC, 96/93/EC and 97/78/EC and Council Decision 92/438/EEC (Official Controls Regulation) (OJ L 95, 7.4.2017, p. 1).

⁹ Regulation (EU) 2021/2115 of the European Parliament and of the Council of 2 December 2021 establishing rules on support for strategic plans to be drawn up by Member States under the common agricultural policy (CAP Strategic Plans) and financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD) and repealing Regulations (EU) No 1305/2013 and (EU) No 1307/2013 OJ L 435, 6.12.2021, p. 1).

¹⁰ Directive 2006/42/EC of the European Parliament and of the Council of 17 May 2006 on machinery, and amending Directive 95/16/EC (OJ L 157, 9.6.2006, p. 24).

¹¹ Directive 2009/127/EC of the European Parliament and of the Council of 21 October 2009 amending Directive 2006/42/EC with regard to machinery for pesticide application (OJ L 310, 25.11.2009, p. 29).

Council Directive 89/391/EEC¹³

Council Directive 89/656/EEC¹⁴

Council Directive 98/24/EC¹⁵

Directive 2004/37/EC of the European Parliament and of the Council¹⁶

Directive 2009/104/EC of the European Parliament and of the Council¹⁷

Regulation (EC) No 1907/2006 of the European Parliament and of the Council¹⁸

Directive 2008/68/EC of the European Parliament and of the Council¹⁹

2. The existence and risks of illegal and counterfeit plant protection products, the methods to identify such products, and the penalties associated with sale or use of illegal plant protection products.
3. The hazards of and risks associated with plant protection products, and how to identify and control them, including the following subjects:
 - (a) risks to human health;
 - (b) symptoms of plant protection product poisoning and appropriate first aid measures in case of such poisoning;
 - (c) risks to non-target plants and insects, wildlife, biodiversity and the environment in general.
4. Integrated pest management strategies and techniques, integrated crop management strategies and techniques, organic farming principles, biological pest control methods, harmful organism control methods, the obligation to apply integrated pest management as set out in Articles 12 and 13 of this Regulation, and the obligation to enter records in the electronic integrated pest management and plant protection product use register, as set out in Article 14 of this Regulation.

¹² Directive 2000/60/EC of the European Parliament and of the Council of 23 October 2000 establishing a framework for Community action in the field of water policy (OJ L 327, 22.12.2000, p. 1).

¹³ Council Directive 89/391/EEC of 12 June 1989 on the introduction of measures to encourage improvements in the safety and health of workers at work (OJ L 183, 29.6.1989, p. 1).

¹⁴ Council Directive 89/656/EEC of 30 November 1989 on the minimum health and safety requirements for the use by workers of personal protective equipment at the workplace (third individual directive within the meaning of Article 16 (1) of Directive 89/391/EEC) (OJ L 393, 30.12.1989, p. 18).

¹⁵ Council Directive 98/24/EC of 7 April 1998 on the protection of the health and safety of workers from the risks related to chemical agents at work (OJ L 131, 5.5.1998, p. 11).

¹⁶ Directive 2004/37/EC of the European Parliament and of the Council of 29 April 2004 on the protection of workers from the risks related to their exposure to carcinogens or mutagens at work (OJ L 158, 30.4.2004, p. 50).

¹⁷ Directive 2009/104/EC of the European Parliament and of the Council of 16 September 2009 concerning the minimum safety and health requirements for the use of work equipment by workers at work (second individual Directive within the meaning of Article 16(1) of Directive 89/391/EEC) (OJ L 260, 3.10.2009, p. 5).

¹⁸ Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC (OJ L 396, 30.12.2006, p. 1).

¹⁹ Directive 2008/68/EC of the European Parliament and of the Council of 24 September 2008 on the inland transport of dangerous goods (OJ L 260, 30.9.2008, p. 13).

5. When plant protection products are needed, how to choose the plant protection products with the least side effects on human health, non-target organisms and the environment among all authorised products for a given pest problem, in a given situation.
6. Measures to minimise risks to humans, non-target organisms and the environment, including:
 - (a) safe working practices for storing, handling and mixing plant protection products;
 - (b) safe working practices for disposing of empty packaging, other contaminated materials and surplus plant protection products (including tank mixes), whether in concentrate or dilute form;
 - (c) the recommended way to control operator exposure (including personal protection equipment);
 - (d) information on the correct and safe disposal of plant protection products that are no longer authorised and where any grace period for their use under Article 20(2) or 46 of Regulation 1107/2009 has expired.
7. Procedures for preparing application equipment for operation, including its calibration, with minimum risks to the user, other persons, non-target animal and plant species, biodiversity and the environment, including water resources.
8. Practical training on the use of application equipment and its maintenance, and on risk mitigation measures including specific spraying techniques, use of new technology including precision farming techniques, as well as the technical check of sprayers in use and ways to improve spray quality. In this subject special attention shall be paid to the drift-reduction nozzles and the recommendations made by the manufacturers concerning optimal conditions of their use. Specific risks linked to use of handheld application equipment or knapsack sprayers and the relevant risk management measures. Practical training shall also cover the specific risks linked to the sowing of seeds treated with plant protection products.
9. Emergency action to protect human health and the environment, including water resources in case of accidental spillage and contamination and extreme weather events that would result in plant protection products leaching risks.
10. Special care in sensitive areas as defined in Article 2(15) of this Regulation and protection areas established under Articles 6 and 7 of Directive 2000/60/EC and an awareness of contamination caused by particular plant protection products in their respective region.
11. Facilities providing health monitoring and access to health care to which information on acute and chronic poisoning incidents can be reported..
12. Record keeping of the sale, purchase and use of plant protection products, in accordance with the relevant legislation.
13. How to minimise or eliminate applications of certain plant protection products classified as “harmful to aquatic life with long lasting effects”, “very toxic to aquatic life with long lasting effects” or “toxic to aquatic life with long lasting effects” pursuant to Regulation (EC) 1272/2008 on or along roads, railway lines, very permeable surfaces or other infrastructure close to surface water or groundwater or on sealed surfaces with a high risk of run-off into surface water or sewage systems.

14. The protection of the aquatic environment and drinking water supplies from the impact of plant protection products, including in relation to the following subjects:
- (a) the use of plant protection products in accordance with the restrictions indicated on the label in accordance with Article 31, point (4)(a) of Regulation (EC) No 1107/2009, while giving preference to plant protection products that are not classified as “(very) persistent”, “(very) bioaccumulative”, “very toxic to aquatic life with long lasting effects”, “toxic to aquatic life with long lasting effects” or “harmful to aquatic life with long lasting effects” pursuant to Regulation (EC) No 1272/2008²⁰ or containing priority substances included in the list adopted by the Commission in accordance with Article 16 of Directive 2000/60/EC implemented via Directives 2008/105/EC and 2013/39/EU, or pesticides having been identified as river basin specific pollutants under Annex V, point 1.2.6 of Directive 2000/60/EC, in particular those affecting water used for the abstraction of drinking water in accordance with Article 7 of Directive 2000/60/EC and Directive (EU) 2020/2184;
 - (b) potential hazards of and risks for human health and the environment from the use of plant protection products, as well as methods to minimise emissions to the environment and occupational exposure to more hazardous plant protection products;
 - (c) use of drift reducing technology in all field crops;
 - (d) use of other mitigation measures which minimise the risk of off-site pollution caused by spray drift, drain-flow and run-off, including in particular mandatory buffer zones adjacent to surface waters courses and groundwater and aquifers;
 - (e) how to comply with restrictions set out in Regulation (EC) 1107/2009 for minimising or substituting uses of the plant protection products classified as “harmful to aquatic life with long lasting effects”, “very toxic to aquatic life with long lasting effects” or “toxic to aquatic life with long lasting effects” pursuant to Regulation (EC) No 1272/2008, on or along roads, railway lines, very permeable surfaces or other infrastructure close to surface water or groundwater or on sealed surfaces with a high risk of run-off into surface water or sewage systems.

²⁰ Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (OJ L 353, 31.12.2008, p. 1).

ANNEX IV

INSPECTION OF APPLICATION EQUIPMENT IN PROFESSIONAL USE

The inspection of application equipment in professional use shall cover all aspects important to ensure a high level of safety and protection of human health and the environment. Full effectiveness and safety of the application operation shall be ensured by proper performance of any device or apparatus of the equipment to guarantee the following objectives are met.

The application equipment in professional use shall function reliably and be used only in accordance with its manual of operation for its intended purpose ensuring that plant protection products can be accurately applied in line with good agricultural practice (GAP) as defined in Article 3(2), point (a), of Regulation (EC) 396/2005 of the European Parliament and the Council²¹.

The equipment shall be in such a condition to allow it to be filled and emptied safely, easily and completely and to prevent any leakage of either spray solution or concentrated product. It shall permit easy and thorough cleaning. It shall also allow for safe operation, and be capable of being immediately stopped from the position of the operator. It shall be simple to perform any necessary adjustments. Such adjustments shall be accurate and capable of being reproduced.

During inspection, compliance with the following requirements shall be checked:

1. Safety

The equipment shall be clean and safe before the inspection starts. The following shall be checked:

- the power take off driveshaft guard and all protective devices for the power take off and other rotating power transmission parts,
- leakage from the hydraulic system and general condition of hydraulic cylinders and pipes,
- safety and functioning of all electrical parts, including solenoid switches,
- functioning of safety valves,
- condition of structural parts, framework, and booms/nozzle holders,
- locking of foldable parts, and
- in the case of any equipment that uses air assistance, the guards and condition of the blower, including the physical condition of the blower unit, fan and sleeves.

2. Leakage

Both in stationary and working conditions there shall be no leakage or dripping from any part of the equipment. There shall be no dripping or unintended application after the equipment has been switched off. For equipment to apply liquid products there

²¹ Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC (OJ L 70, 16.3.2005, p. 1).

shall be no leakages from pipes or hoses when running at the maximum obtainable pressure for the system and no liquid shall have been applied directly to the sprayer itself.

3. Pump (for equipment used to apply liquid products)

The pump capacity shall be suited to the needs of the application equipment and the pump shall function properly in order to ensure a stable and reliable application rate.

4. Agitation or mixing (for equipment to apply liquid products)

Agitation or mixing devices shall ensure a proper recirculation in order to achieve an even concentration of the whole volume of the liquid spray mixture in the tank.

5. Spray liquid tank/hopper

Spray tanks and hoppers including filling level indicators, filling devices, filters, emptying and rinsing systems and mixing devices shall operate in such a way as to minimise accidental spillage, uneven concentration distribution, operator exposure and residual content.

6. Measuring systems, control and regulation systems

All devices for measuring, switching on and off and adjusting pressure or flow rate shall be properly calibrated and work correctly. The controls to be operated during the application operation shall be operable from the operator's position, the necessary instruments to control the operation shall be present and accurate and the instrument displays shall be readable from the operator's position. For equipment to apply liquid products, pressure adjustment devices shall maintain a constant working pressure at constant revolutions of the pump, in order to ensure that a stable volume application rate is applied. Additional equipment to dose or inject plant protection products shall function accurately and correctly.

7. Pipes and hoses

Pipes and hoses shall be in properly functioning condition to avoid disturbance of product flow or accidental spillage in case of failure. Pipes and hoses shall not be kinked, excessively worn or in a position which would allow stretching.

8. Filtering (for equipment to apply liquid products)

In order to avoid turbulence and heterogeneity in spray patterns, filters shall be present and in good condition and the mesh size of the filters shall correspond and be appropriate to the size of nozzles fitted on the sprayer. Where applicable the filter blockage indication system shall operate correctly.

9. Spray boom (for equipment applying plant protection products by means of a horizontally or vertically positioned boom, located close to the crop or the material to be treated)

The boom shall be in good condition and stable in all directions. The fixation and adjustment systems and the devices for damping unintended movements and slope compensation shall work correctly.

10. Nozzles (for equipment to distribute liquid products)/ outlets (for solid products)

Nozzles and outlets shall work properly. The flow rate of each individual nozzle and outlet shall not deviate significantly from the data of the flow rate tables provided by the manufacturer.

11. Distribution

Where relevant, the longitudinal, transversal and vertical (in case of applications in vertical crops) distribution of the product in the target area shall be even.

12. Blower (for equipment distributing plant protection products by air assistance)

The blower shall be in good condition and shall ensure a stable and reliable air stream.

13. Cleaning

If present, the rinsing/cleaning systems for emptied containers, e.g. fitted on induction hoppers of application equipment, shall work reliably. Moreover, if provided, tank cleaning devices, devices for external cleaning, devices for cleaning of induction hoppers and devices for the internal cleaning of the complete application equipment shall function correctly.

ANNEX VI
referred to in Article 35

**METHODOLOGY FOR CALCULATING HARMONISED RISK INDICATORS AT
UNION AND NATIONAL LEVEL**

SECTION 1

Harmonised risk indicators

The methodology for calculating harmonised risk indicators at both Union and national levels is listed in Sections 2 to 4 of this Annex. While the methodology for both Union and national indicators is the same, the former is based on Union wide statistics while the latter are based on national statistics. These indicators shall be calculated annually.

SECTION 2

**Harmonised risk indicator 1: hazard-based harmonised risk indicator based on the
quantities of active substances placed on the market in plant protection products under
Regulation (EC) No 1107/2009**

1. This indicator shall be based on statistics on the quantities of active substances placed on the market in plant protection products under Regulation (EC) No 1107/2009, provided to the Commission (Eurostat) under Annex I of Regulation (EC) No 1185/2009. Those data are categorised into 4 groups.
2. The following general rules shall apply for the calculation of harmonised risk indicator 1:
 - (a) harmonised risk indicator 1 shall be calculated on the basis of the categorisation of all active substances into the 4 groups set out in Table 1;
 - (b) the active substances in group 1 shall be those listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011;
 - (c) the active substances in group 2 shall be those listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011;
 - (d) the active substances in group 3 shall be chemical active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and are listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408;
 - (e) the active substances in group 4 shall be those not approved under Regulation (EC) No 1107/2009, and therefore not listed in the Annex to Implementing Regulation (EU) No 540/2011;
 - (f) the weightings in row (iii) in Table 1 shall apply.
3. Harmonised risk indicator 1 shall be calculated by multiplying the annual quantities of active substances in plant protection products placed on the market for each group in Table 1 by the relevant hazard weighting set out in row (iii), followed by the aggregation of the results of these calculations.

Table 1

Categorisation of active substances and hazard weightings for the purpose of calculating harmonised risk indicator 1

Row	Groups			
	1	2	3	4
(i)	Low-risk active substances which are approved or deemed to be approved under Article 22 of Regulation (EC) No 1107/2009, and which are listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011	Active substances approved or deemed to be approved under Regulation (EC) No 1107/2009, and not falling in other categories, and which are listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011	Active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408.	Active substances which are not approved under Regulation (EC) No 1107/2009, and therefore which are not listed in the Annex to Implementing Regulation (EU) No 540/2011
(ii)	Hazard weightings applicable to quantities of active substances placed on the market in products authorised under Regulation (EC) No 1107/2009			
(iii)	1	8	16	64

4. The baseline for harmonised risk indicator 1 shall be set at 100, and is equal to the average result of the above calculation for the period 2011-2013.
5. The result of harmonised risk indicator 1 shall be expressed by reference to the baseline.
6. The Commission shall calculate and publish the results of harmonised risk indicator 1 at Union level in accordance with Article 35(2) of this Regulation for each calendar year and at the latest 20 months after the end of the year for which harmonised risk indicator 1 is being calculated.
7. The Member States shall calculate and publish the results of harmonised risk indicator 1 at national level in accordance with Article 35(3) of this Regulation for each calendar year and at the latest 20 months after the end of the year for which harmonised risk indicator 1 is being calculated.

SECTION 3

Harmonised risk indicator 2: harmonised risk indicator based on the number of authorisations granted under Article 53 of Regulation (EC) No 1107/2009

1. This indicator shall be based on the number of authorisations granted for plant protection products under Article 53 of Regulation (EC) No 1107/2009 as

communicated to the Commission in accordance with Article 53(1) of that Regulation. Those data are categorised into 4 groups.

2. The following general rules shall apply for the calculation of harmonised risk indicator 2:
 - (a) harmonised risk indicator 2 shall be based on the number of authorisations granted under Article 53 of Regulation (EC) No 1107/2009, and it shall be calculated on the basis of the categorisation of active substances into the 4 groups set out in Table 2 of this Section;
 - (b) the active substances in group 1 shall be those listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011;
 - (c) the active substances in group 2 shall be those listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011;
 - (d) the active substances in group 3 shall be chemical active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and are listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408;
 - (e) the active substances in group 4 shall be those not approved under Regulation (EC) No 1107/2009, and therefore not listed in the Annex to Implementing Regulation (EU) No 540/2011;
 - (f) The weightings in row (iii) in Table 2 of this Section shall apply.
3. Harmonised risk indicator 2 shall be calculated by multiplying the number of authorisations granted for plant protection products under Article 53 of Regulation (EC) No 1107/2009 for each group in Table 2 by the relevant hazard weighting set out in row (iii), followed by the aggregation of the results of these calculations.

Table 2

Categorisation of active substances and hazard weightings for the purpose of calculating harmonised risk indicator 2

Row	Groups			
	1	2	3	4
(i)	Low-risk active substances which are approved or deemed to be approved under Article 22 of Regulation (EC) No 1107/2009, and which are listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011	Active substances approved or deemed to be approved under Regulation (EC) No 1107/2009, and not falling in other categories, and which are listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011	Active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408.	Active substances which are not approved under Regulation (EC) No 1107/2009, and therefore which are not listed in the Annex to Implementing

				Regulation (EU) No 540/2011
(ii)	Hazard weightings applicable to quantities of active substances placed on the market in products authorised under Regulation (EC) No 1107/2009			
(iii)	1	8	16	64

4. The baseline for harmonised risk indicator 2 shall be set at 100, and is equal to the average result of the above calculation for the period 2011-2013.
5. The result of harmonised risk indicator 2 shall be expressed by reference to the baseline.
6. The Commission shall calculate and publish the results of harmonised risk indicator 2 at Union level in accordance with Article 35(2) of this Regulation for each calendar year and at the latest 20 months after the end of the year for which harmonised risk indicator 2 is being calculated.
7. The Member States shall calculate and publish the results of harmonised risk indicator 2 at national level in accordance with Article 35(3) of this Regulation for each calendar year and at the latest 20 months after the end of the year for which harmonised risk indicator 2 is being calculated.
8. With effect from 1 January 2027, the methodology of harmonised risk indicator 2 shall be replaced by the methodology of harmonised risk indicator 2a referred to in section 4 of this Annex.

SECTION 4

Harmonised risk indicator 2a: harmonised risk indicator based on the number of and areas treated under authorisations granted under Article 53 of Regulation (EC) No 1107/2009

1. This indicator shall be based on the number of authorisations granted for plant protection products under Article 53 of Regulation (EC) No 1107/2009, and the extent of the areas treated under these authorisations, as communicated to the Commission in accordance with Article 53(1) of that Regulation.
2. The following general rules shall apply for the calculation of harmonised risk indicator 2a:
 - (a) harmonised risk indicator 2a shall be based on the number of authorisations granted under Article 53 of Regulation (EC) No 1107/2009 and the extent of the areas treated under these authorisations. It shall be calculated on the basis of the categorisation of active substances into the 4 groups set out in Table 3 of this Section;
 - (b) the areas treated shall be in hectares;
 - (c) the active substances in group 1 shall be those listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011;
 - (d) the active substances in group 2 shall be those listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011;

- (e) the active substances in group 3 shall be chemical active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and are listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408;
- (f) the active substances in group 4 shall be those not approved under Regulation (EC) No 1107/2009, and therefore not listed in the Annex to Implementing Regulation (EU) No 540/2011;
- (g) The weightings in row (iii) in Table 3 of this Section shall apply.
3. Harmonised risk indicator 2a shall be calculated by multiplying the number of authorisations granted for plant protection products under Article 53 of Regulation (EC) No 1107/2009 for each group in Table 3 by the relevant hazard weighting set out in row (iii), and by the areas treated under these authorisations, followed by the aggregation of the results of these calculations.

Table 3

Categorisation of active substances and hazard weightings for the purpose of calculating harmonised risk indicator 2a

Row	Groups			
	1	2	3	4
(i)	Low-risk active substances which are approved or deemed to be approved under Article 22 of Regulation (EC) No 1107/2009, and which are listed in Part D of the Annex to Implementing Regulation (EU) No 540/2011	Active substances approved or deemed to be approved under Regulation (EC) No 1107/2009, and not falling in other categories, and which are listed in Parts A and B of the Annex to Implementing Regulation (EU) No 540/2011	Active substances that are approved as candidates for substitution in accordance with Article 24 of Regulation (EC) No 1107/2009 and listed in Part E of the Annex to Implementing Regulation (EU) No 540/2011, or that are listed in the Annex to Implementing Regulation (EU) 2015/408.	Active substances which are not approved under Regulation (EC) No 1107/2009, and therefore which are not listed in the Annex to Implementing Regulation (EU) No 540/2011
(ii)	Hazard weightings applicable to quantities of active substances placed on the market in products authorised under Regulation (EC) No 1107/2009			
(iii)	1	8	16	64

4. The baseline for harmonised risk indicator 2a shall be set at 100, and is equal to the average result of the above calculation for the period 2022-2024.

5. The result of harmonised risk indicator 2a shall be expressed by reference to the baseline.
6. The Commission shall calculate and publish the results of harmonised risk indicator 2a at Union level in accordance with Article 35(2) of this Regulation. This shall be done for the first time in 2027 using data from calendar years 2022 to 2025, and subsequently for each calendar year, at the latest 20 months after the end of the year for which harmonised risk indicator 2a is being calculated.
7. The Member States shall calculate and publish the results of harmonised risk indicator 2a at national level in accordance with Article 35(3) of this Regulation. This shall be done for the first time in 2027 using data from calendar years 2022 to 2025, and subsequently for each calendar year, at the latest 20 months after the end of the year for which harmonised risk indicator 2a is being calculated.
